We also need to see something of a template for the final preparation of a TASC report which I think David said he could forward to us. Debbi, is right, we need to see what Ella's group submitted to EPA at year's end. Perhaps these two documents will help crystallize some next steps.

Hi Dave, Sorry have been out all this week and just catching up  
all this looks right, also I think we still need to get our hands around the broader messaging and communication issues, it is still quite fuzzy and I think we need to provide some more concrete ideas and next steps for folks to talk about

I believe I heard some questions surrounding agenda topics for the next meeting and whether there would be sufficient topics to discuss due to the short amount of time since the April meeting. your decision as a CAG whether to hold and what topics. We will support you.

My thoughts:

- technical assistance support request on sediment decon
  - discussion and finalization
- technical assistance: how TAG and TASC products/efforts can be disseminated to the broader community
- removal update
- 10.9 update:
  - what EPA heard at the May 9 public meetings and how that will be used / action items
  - messaging

- project update (settlement, vendors, technical)
